Mardi Gras

Mardi Gras

Plant Pat. Applied For — A giant magician, changing its cloak at will! First the huge 4-4 1/2 in. cactus blossom is nearly velvety red — then scorching orange-bronze — finally ripe bronzy yellow. One surprise after another; but, always appealing and novel from mid-September on. Bushy, rounded 20 in. bush of lush foliage. A thrilling succession of mammoth flowers you'll never forget!

\$1.50 ea., 3 or more at \$1.25 each

Pink Cherub

Plant Pat. Applied For — Here the mood changes abruptly to the petite, the saucy. There are scads of globular 1-1 1/2 in. pompons, shining rose pink deepened near the centers. Each pert bloom honeycombed tiers of perfection, bunched into firm little sprays for short arrangements. Bustling, diligent dwarf plant 12-16 in. high charms from Sept. 15 till the "oilman cometh" in haste. Little Miss America, a merry minx.

\$1.50 ea., 3 or more at \$1.25 each

Headliner

Plant Pat. Applied For — Now and then a truly superb mum fairly streaks across the horizon, a floral masterpiece, a certain winner. Such is Headliner, where matchless quality attend amazing liberality. Natty, erect 2 ft. clump of marvelous spray production. Lusciously full, slightly recurving 3 1/2 in. blossom, glowing terra-cotta swelling to gorgeous walnut-coral. Like hallowed old Granny Scovill, but far superior! Magnetic, wondrously different, early — Sept. 25. The Mum time will honor!

\$1.50 ea., 3 or more at \$1.25 each

Mums are Easy to Grow, A Few Simple Do's and Don'ts on Mum Culture

DO

1. Give all possible sunlight.
2. Have soil analyzed if uncertain. Your state Experiment Station does this free of charge.
3. Have some humus in soil—peat moss, manure, leaf mold, etc.
4. Pinch! Tip shoots lightly at 6 in., then again each resulting 6 in. Stop all pinching after July 20 to 30, to let buds form. Stockier, more floriferous clumps result.
5. Use 5-10-10, Mum-Gro, etc., to get new roots started first.

DON'T

1. Plant too early. Wait for frosts to cease. June is ideal in New England.
2. Expect plants to grow instantly. Allow a couple of weeks.
3. Crowd Mums too much. 18 to 24-in. spacing is ideal.
4. Let old plants go undivided. Most varieties should be split each spring.
5. Leave early summer buds on. Keep them removed till new shoots appear.

More detailed instructions with each shipment, including disbudding routine.

FINALLY, JUST A FEW BRIEF NOTES . . .

1. Bristol Mums are strong potted plants, not just rooted cuttings.
2. We recommend spring planting only, for northern areas.
3. "3 for \$2.75," for instance, means 3 of that one variety, not 2 of one, and 1 of some other.
4. Full cultural instructions accompany each shipment. Don't be frightened. Mums are easy to grow and enjoy!
5. Varietal colors, performances, dates of bloom, etc., may vary in different localities and soils. We judge mainly on results at Bristol.
6. Thanks for your continued patronage. We hope to remain friends for years to come.

Mum-Gro

Bristol's Own Mum Fertilizer

You get hungry — so do your mums. Give them Mum-Gro, first for the strong feeding roots, next the lush green leaves, finally the sinewy stems and lovely flowers.

It's safe-based on sound 5-10-10 formula — you can use it on any other plants, too.

Can pre-broadcast planting area at 3 lbs. per 100 sq. ft. More economically, you can give each plant a heaping tablespoonful at planting time. It may pay to repeat at half dosage in August.

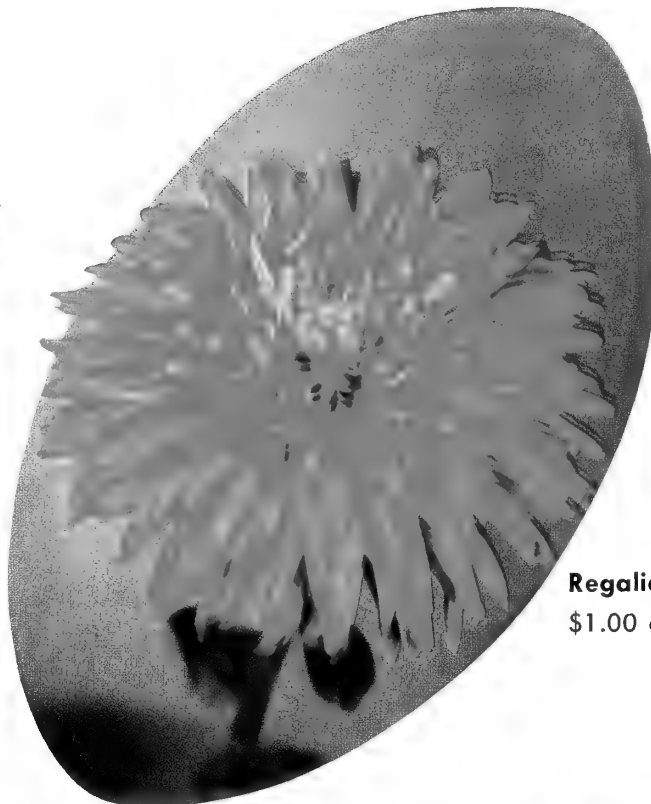

5 lb. bag \$1.80 postpaid (please add 25c West of Mississippi River). Takes care of 100 plants all year. Try to store in dry, cool place.
